

World Environment Day 2026

PLANTING FOR A BETTER TOMORROW

Nuture Brands marked World Environment Day in a practical way this year, by partnering with Food & Trees For Africa & planting trees at Isiphiwo Primary School, Khayelitsha in the Western Cape.

The remainder of the donated trees will be planted in two other provinces in South Africa, namely: Gauteng & the Eastern Cape.

This initiative forms part of our ongoing commitment to care for the environment in ways that can be

A DAY AT ISIPHIWO PRIMARY SCHOOL

The Nuture Brands team, led by the Group HR Executive, Illona Giani, was warmly welcomed by the school Principal, Educators, the NGO Iphupha Lam & learners who shared songs, drama and poetry as part of the day's programme.

It was a simple but powerful reminder that corporate environmental stewardship is not only about targets & reports, but it is about people, schools and communities.

WHAT THIS SUPPORTS

Every tree planted reflects our commitment to:

- | | | |
|---|--|---|
| <p>1</p> <p>Reducing our carbon footprint</p> | <p>2</p> <p>Investing in a more sustainable future for the next generation</p> | <p>3</p> <p>Supporting healthier and more resilient communities</p> |
|---|--|---|

This initiative supports *SDG 13: Climate Action*, by helping to capture carbon emissions, improve air quality and build resilience against climate change. It also supports *SDG 15: Life on Land*, by helping to protect biodiversity and encourage better use of the land around us.

Sustainability is a shared responsibility. And it grows

WHY TREES MATTER

Planting a tree may seem like a small insignificant act but with time & care, it becomes part of a solution to a bigger global challenge which supports environmental sustainability.

Trees help clean the air, provide shade, support biodiversity and create healthier spaces for children and communities.
